

**Amendments to the Specification**

**On page 6, line 13, please replace the paragraph with the following:**

“A flowchart of one embodiment of the invention using random numbers is shown in Figure 3. At 30 a first set of seed values is generated. These seed values would typically be generated from a random number or noise generator. In the case of pseudo-random noise, the numbers may ~~would~~ be manipulated to achieve other effects, as discussed above in the monochrome printing application.”
